Talked with David Harn.

He said that Commissioner Kevin Wordelman asked that the committee hear out BioTech with the hopes of passing a resolution of support for them. The next meeting is 4/13/16 at 9 in the morning. Jim Pearson and David wanted to make it clear that we are welcome to attend because it is a public meeting. We should probably consider how to approach this.

Paul

Hi Paul,

I wanted to let you know about a conversation I had with Jim Pearson, chairman of the County Health Advisory Committee (a group that I also participate on). Jim indicated that one of the county commissioners that sits on the group has requested that we hear a presentation from a firm regarding a biotechnology they claim can

clean up the PCBs at the landfill. The commissioner's expectation is that the committee would then vote on a resolution of support for this technology that would be forwarded to county.

Jim was coming to me because he has serious concerns on many fronts, not the least of which is showing support for something like this without alternate views or giving the EPA and/or DEQ an opportunity to attend or make its own presentation. I told Jim I would forward this information on to you to see if you or someone from the EPA wanted to be present at the meeting and what, if any, role you wanted in this. Apparently, this presentation will occur during our April meeting. As I get more details, I'll pass them on. In the meantime, if you would like to discuss further, please feel free to contact me.

Thanks,

David L. Harn, Jr.
